SUBJECT: Contract A-101

25X1A

TO:

Dear Luther:

25X1A

Reference your telephone conversation with [REDACTED] concerning Spares Lists in Subject Contract.

25X1A

Attached is a copy of a letter from [REDACTED] with a Contract A-101 Spares Analysis also prepared by Dean.

In order that we will know exactly what spares are due in against Contract A-101 we asked Dean to give us the information set forth in attached "Spares Analysis". This analysis lists each spares listing and the date of the latest revision of each list.

Our contract A-101 Due In records are posted from the latest revisions of the spares listings. As you know, all additions, deletions and corrections are brought forward in the latest revisions of these A-101 spares lists. Consequently, the only way to determine what is due in against Contract A-101 is to use the latest revision of each spares listing. As you may note, many of these latest dates of revision are not listed in Contract A-101 because revisions were made after the printing of Amendment No. 18. It is our recommendation that Contract A-101 be corrected to reflect the "Current List Revision", and "Date of Revision", as listed in Dean's attached A-101 Spares Analysis. This will afford the Depot and contract auditors an exact means of checking contract receipts against correct contract due ins.

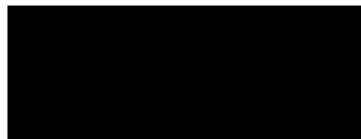

Our certification of delivery for eventual termination of Contract A-101 will be made in accordance with items as set forth in the latest revisions of the spares listings.

As a matter of information, Dean mentioned that he had some changes that he was going to forward to you. In the third paragraph of Dean's letter is one of these changes. He states that the Contract calls for 44 sets of Patch Cables where as the quantity should have been 50 sets. We have these extra sets at the Depot and plan to use them if you can correct the contract to read 50 sets. Please let us know if this correction can be made.

Sincerely,

25X1A
